Russ – FYI - The facility in MO is called Carbolytic Materials Company or CMC. I am not sure if they are still operating or not, but it appears they are. Below is a link to their website as well as a link to their de minimus construction permit on MDNR's website. I'd assume there is more info in the records center (both @ EPA and @ MDNR), so let me know if it would be beneficial to do more digging.

<http://www.carbolytic.com/product/index.html>
